

Low Cost Drinking Water Testing

- Does your drinking water come from a well, cistern, spring, or hauled water storage tank?
- Do you wonder if your water is safe to drink?

Summit County Public Health's Lab can test your water for bacteria!

To have your water tested:

1. Obtain a sample kit – kits are located at our office, listed below, and at many community offices throughout Summit County
2. Follow the instructions included with the kit
3. Return your sample and the \$10.00 fee to our office located at:
