

Public Meeting Hosted by Ohio EPA

Wastewater Permit in Peninsula

When

July 1, 2025
6 p.m.

Where

Peninsula Town Hall, 1582 Main St.
Peninsula, OH 44264

Let us know what you think.

We will share information, answer questions, and take comments.

What

Ohio EPA is seeking public comment on an [application](#) for a wastewater discharge permit, also called a National Pollutant Discharge Elimination System (NPDES) permit.

Why

Summit County Department of Sanitary Sewer Services plans to construct a water reclamation facility at 6171 North Locust Street in the village of Peninsula. The proposed facility would discharge an average day flow of 130,000 gallons to the Cuyahoga River.

The permit limits the quantities of pollutants that can be released and imposes monitoring requirements and other conditions.

How

Submit comments directly on Ohio EPA's [Public Comment Form](#), via mail to: Ohio EPA-DSW, Attn: Permits Processing, PO Box 1049, Columbus, OH 43216-1049, or attend the public hearing. All comments submitted are considered equally.
